

HARSH NAGAR

7819981941 | harshn845@gmail.com | Haridwar, UK, India
GitHub | LinkedIn | LeetCode

PROFILE SUMMARY

Computer Science undergraduate with hands-on Python development experience and a strong interest in AI/LLM-powered automation. Has built and shipped projects integrating REST APIs with AI models (Gemini API, IBM Watson AI) to power intelligent, conversational, and automated systems. Comfortable working independently with ambiguous requirements, debugging and iterating quickly, and using Git/GitHub for version control. Eager to work directly with founders on live client projects, prototyping AI agents and automation workflows in a fast-paced, startup environment.

EDUCATION

Bachelor of Technology in Computer Science 2022 – 2026

CGC University, Mohali, India

- CGPA: 8.02

Higher Secondary (Physics, Chemistry, Mathematics) 2020 – 2022

St Mary's Sr Sec School, Haridwar, UK

- Percentage: 79.6%

Matriculation 2020

St Mary's Sr Sec School, Haridwar, UK

- Percentage: 88.4%

INTERNSHIP / TRAINING

AI/ML Intern June 2024 – July 2024

Edunet Foundation

Online

- Built a conversational chatbot using IBM Watson AI, applying LLM/NLP techniques to automate user interactions — directly relevant to AI-powered chatbot and automation work.
- Leveraged natural language processing to design intelligent, context-aware conversational experiences.

Java Developer June 2024 – July 2024

Bharat Heavy Electricals Limited

Haridwar

- Worked as a Java Developer on enterprise-level applications, writing clean, maintainable backend code.
- Built an Employee Payroll System with accurate payroll calculations, leave deductions, and workday tracking.

PROJECTS

Smart Email Assistant 2025

Java, Spring Boot, Gemini API, Postman

- Built an AI-powered email generator by integrating the Gemini API into a Spring Boot backend for automated content creation.
- Designed and implemented RESTful APIs (GET, POST, PUT, DELETE) for backend integration, tested via Postman.
- Optimized API call performance for faster, more reliable AI-generated responses.

AI Campus Security — Face Recognition System 2024

Python, FaceNet, OpenCV

- Designed a CNN-based deep learning face recognition system in Python for automated security identification.
- Improved detection accuracy using feature extraction and classification techniques with OpenCV.

PacMan Game 2025

Java, Java Swing, OOP

- Developed a PacMan game in Java using Swing, implementing player movement and collision handling.
- Applied OOP concepts (classes, objects, game loops) and built ghost AI with pathfinding for multiple difficulty levels.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, JavaScript, HTML/CSS
- **AI / LLM & Automation:** Exposure to AI/LLM tools including Gemini API, IBM Watson AI; working knowledge of LangChain and Claude for building AI agents and automation workflows
- **APIs and Web Services:** RESTful APIs, API Integration, HTTP Methods, Postman
- **Core Concepts:** Data Structures, Object-Oriented Programming (OOP), Backend Development, Design Patterns, Multithreading, Test-Driven Development (TDD)
- **Tools/Platforms:** Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Postman
- **Databases:** MySQL, SQL (CRUD Operations)
- **Soft Skills:** Self-Starter, Quick Learner, Problem Solving, Active Listener, Time Management, Communication, Team Collaboration

CERTIFICATIONS

- Claude Code in Action
- Introduction to LangChain
- 5-Star Coder (Java) – HackerRank
- MySQL – Kaggle
- Hack-N-Win Participation Certificate – CGC Jhanjeri
- Website Development – CGC Jhanjeri

CODING PROFILES

- 5 Star Java on HackerRank
- Solved 90+ problems on LeetCode (Data Structures & Algorithms)
